

Luke,

It was nice to meet you today and watch you in action. You did an excellent job with your lesson and it was very well organized. You will see a bit of feedback below.

Engagement: Anticipatory set-political propaganda cartoon got the students to share their own thoughts and ideas by giving them open-ended questions. The Turn and Talk activity was a great way for student involvement to take place. Students were willing to share.

Explore: It was nice to see that the students were using Google Classroom which is an excellent technology tool. The reading and guided notes were well done. Thorough, but not too long. The annotation directions and slide were also valuable and a good practice for student to follow when reading material.

Good scanning the classroom while students were working and answering questions.

During the review of guided notes, you did a nice job of explaining important facts as you reviewed answers. The students did an excellent job of volunteering to answer questions. They feel comfortable in the classroom. That is an asset to you and Mrs. Schuele.

Kahoot was an excellent way to review the materials covered during your lesson. Great closing activity. A little formative assessment.

I enjoyed observing and watching you teach. You did a very nice job. I also enjoyed seeing the beautiful school.

I will see you again when everyone in EDU401 has completed their hours and we gather to collect documentation.
